

DINGWALL ACADEMY STUDY ADVICE 1

Where do I start?..

When you have a lot of text to remember you need to be able to summarise the text. When you revise you then need to only read the summary, rather than read everything again.

There are a number of different ways that you can summarise text.

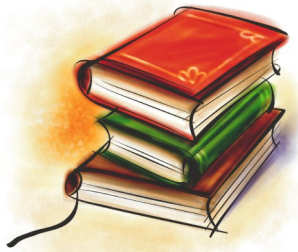

The Post It method is useful if you are using text that you cannot write on or use a highlighter pen on.

You need:

Unit of work/topic to be revised

Post It Notes

Pen

Read through the unit of work. Write down the key words, facts or phrases on a post it note. Attach the Post It note to the top of each page.

You can then

- **Read through the Post It notes and check for understanding. Do this again and again and again ...**
- **Give the Post It notes to some one else—ask them to select a word or phrase and then get you to explain it.**
